

Functions

1. create a function to find the greatest of three numbers
2. create a function to calculate to discount of 10% on price on all the products
3. create a function to calculate the discount on price as following

```
if productname = 'books' then 10%  
if productname = toys then 15%  
else  
no discount
```
4. create inline function which accepts number and prints last n years of orders made from now.
(pass n as a parameter)
